My First Bitcoin

Bitcoin Diploma Redesign: Maintaining Relevance, Increasing Impact.

We are the global leader in grassroots Bitcoin education. To maintain that leadership, we must evolve our structure to improve retention and scalability—without compromising our core identity.

NotebookLM

An Honest Diagnosis of Our Current Ecosystem

Strengths

Unshakeable identity

Practical learning pathways

Thriving grassroots format built on social dialogue

Opportunities

Modular learning

Stronger pedagogical frameworks

Global scalability through an activity bank

Weaknesses

High attrition driven by excessive duration (10–20 hours)

Inconsistent pacing across varied cohorts

Friction Points

Multi-disciplinary scope blurring lines

Technical overload for beginners

Lack of structured educator scaffolding

NotebookLM

The **Structural Pivot:** Monolithic to Modular

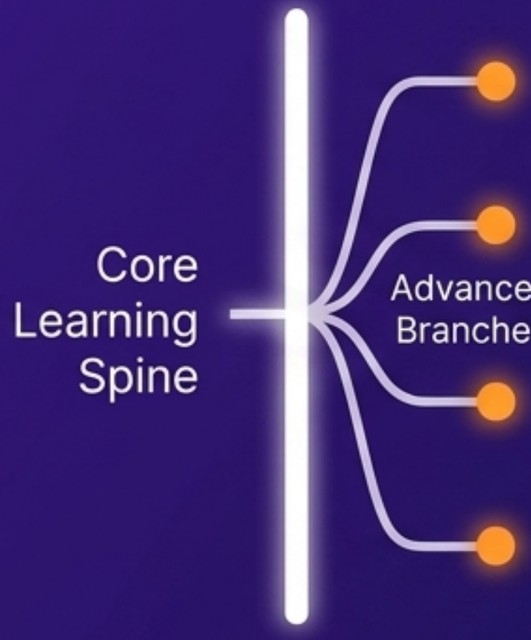

FROM

- Linear
- Long
- Dense
- One-size-fits-all

Impact: High cognitive load and unpredictable 10-20 hour delivery times.

TO

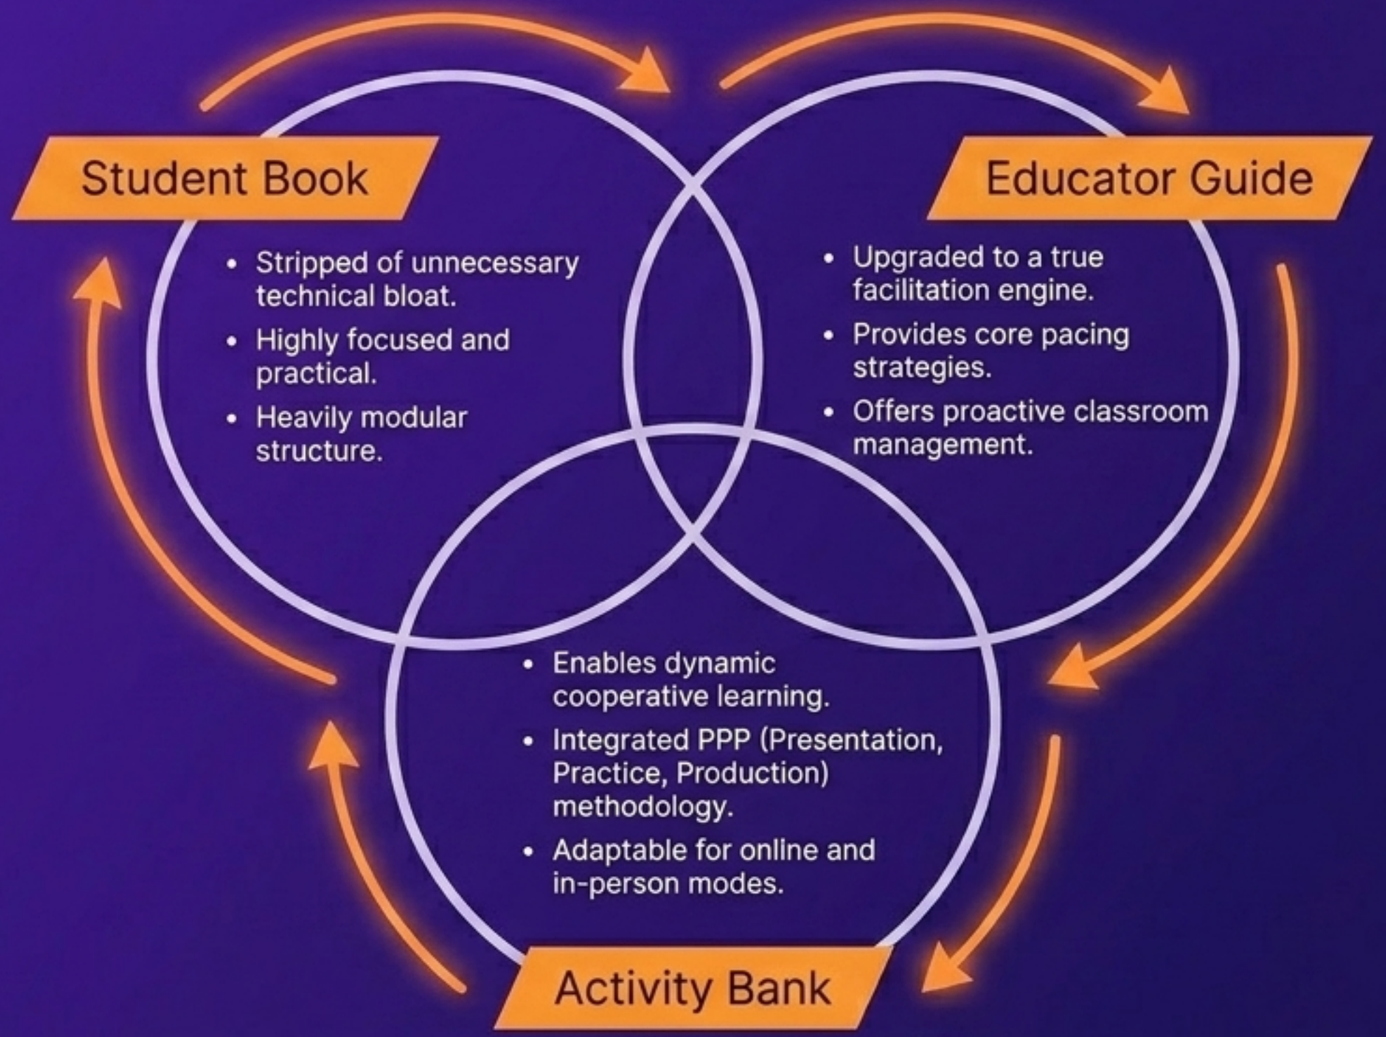

- Modular
- Practical
- Flexible
- Outcome-driven

Impact: Educators can tailor pacing, depth, and specialization to their specific local cohorts.

NotebookLM

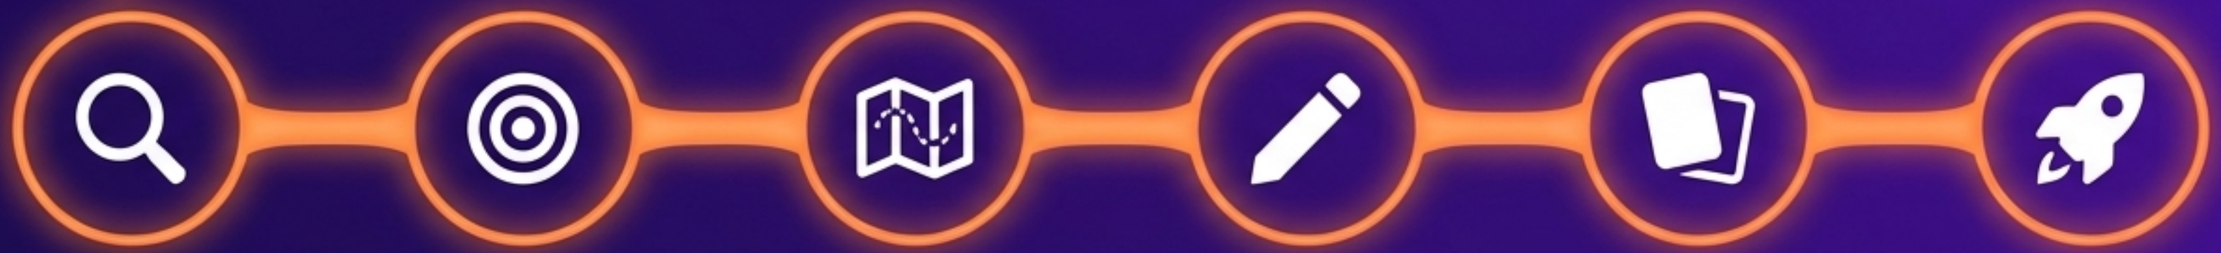

A Complete **Ecosystem** for Educator Success

NotebookLM

The Roadmap to Reality

You Are Here

Research & Structure

Competency mapping and structural assessment.

Objectives

Defining precise, measurable learner outcomes.

Curriculum Mapping

Aligning concepts to the modular spine.

Drafting

Core writing and technical review process.

Activities & Guide

Building the Educator Guide and PPP Activity Bank.

Publication

Launching across Sanity, GitHub, PDFs, and multilingual formats.

NotebookLM

A Shorter, Clearer, More **Captivating** Diploma.

This redesign is not a departure from our roots; it is the foundational infrastructure for the next phase of global Bitcoin education. **Built for retention. Designed to scale.**
